

Installations Engineer, Bucharest

Your new job

Did you recently graduate or do you have some years' experience? Would you like to expand your HVAC, Sanitary or Electrical knowledge and experience? Then we have the right job for you!

Your new job is within the team "industrial & commercial projects". This team executes projects regarding industrial, property and utility buildings. You will work on design, 3d modelling and calculation of installations regarding heating, cooling, ventilation and control systems, sanitary and electrical. You make sure that the needs and wishes of the customer are clear, you write the specifications and make the qualifications of installations. Together with an experienced engineer and after a while independently, you make the design and calculations of your part of the project in the different phases. All according the agreed upon quality, planning and budget. The projects vary in size from small individual projects to large multidisciplinary projects. In this position there is enough room for developing new initiatives and innovations. You will grow as an engineer and/or towards project management.

What do you offer?

You just started your career or have some experience as engineer or designer, within industrial and property market. You are eager, have a quick way of learning and like to be challenged.

At least a bachelor's degree in mechanical engineering).

Flexible in working hours and location. You will work at our office in Bucharest but could also go to one of our other offices and even sometimes at our customers' site.

Good communication and reporting skills.

A good command of the Romanian and English language is a requirement.

What does Tebodin offer

At first, a good job in a pleasant working environment within an international company. Furthermore, a complete package of benefits:

A good salary (reflecting education and experience) with a bonus system. Flexible working hours

- 23 vacation days
- Personal and technical coaching

Team spirit

Come and work for Tebodin and you will experience a true team spirit. Although Tebodin is a large worldwide engineering company, the way we help and pay attention to each other feels like a small, family business. Your colleagues are ambitious and hardworking, but having fun in your work and with colleagues is important to us. You can wear formal when you visit our clients, but you don't have to do this every day. Smart casual is more than good enough to feel comfortable within Tebodin. Try and get to know your colleagues a little bit better and visit our collective lunches and, staff activities.
