

GRADUATE ELECTRICAL ENGINEER: LONDON

The Team

Cundall's Building Services team's mission is to play a key role in making buildings more energy efficient, cost effective to run and, ultimately, more sustainable. Working across a variety of sectors our building services teams are a source of world leading expertise; producing innovative and award-winning sustainable engineering solutions throughout the lifecycle of any building project.

The Role

To start in September 2017, this is an excellent opportunity for a Graduate Electrical Engineer to join the team at our London office, to work on the design of some of the most exciting construction design projects in the UK and worldwide. Working closely with colleagues across our multi-disciplinary practice, you will provide specialist consultancy input on projects across a wide range of sectors including education, healthcare, critical systems and retail.

Under the guidance of our team of expert engineers this wide ranging role will require you to carry out detailed electrical building services engineering design and analysis, defining and translating clients' needs into designs for buildings, facilities and services (electrical distribution and power generation, security and access control) all with sustainability at the forefront of the design.
